Nowhere in the world is more of a success story of terminating racism than in Hawaii. It is one of the most racially diverse places on the planet. Proportionately, Asians outnumber white residents in Hawaii 2:1. It is not surprising that Caucasians are often considered foreigners in Hawaii. While the number of "pure Hawaiians" has decreased, the number of Hawaiians has increased. This originated from the fact that dozens of races have (A) populated Hawaii over the last two hundred years or so. A large variety of nationalities is represented in Hawaiian culture. From many kings to missionaries to explorers, there are plenty of reasons to see why Hawaii is richly diverse in culture.

- What is the best topic for the passage?
① Racial roots of Native Hawaiians
② Racial discrimination in the Hawaiian population
③ Reduced number of pure Hawaiians
④ Diversity in race and culture in Hawaii
- Which of the following is true about Hawaiian history?
① It really began about two hundred years ago.
② It has been dominated by pure Hawaiians.
③ It has suffered from a long series of depopulation.
④ It has played a crucial role in the cultural diversity.
- Which of the following is closest in meaning to (A) populated?
① fertilized ② inhabited ③ popularized ④ restored
- Which of the following is NOT true about Hawaii?
① It is inhabited by a homogeneous population.
② It is made up of various groups of people.
③ It is open-minded about different cultures.
④ It was ruled by kings in the past.

In 2009, my research group found that newborns possess the ability to discern a regular pulse – the beat – in music. It’s a skill that might seem trivial to most of us but that’s fundamental to the creation and appreciation of music. The discovery sparked a profound curiosity in me, leading to an exploration of the biological underpinnings of our innate capacity for music, commonly referred to as (A) “_____.” In a nutshell, the experiment involved playing drum rhythms, occasionally omitting a beat, and observing the newborns’ (B) responses. Astonishingly, these tiny participants displayed an anticipation of the missing beat, as their brains exhibited a distinct spike, signaling a violation of their expectations when a note was omitted. This discovery not only unveiled the musical prowess of newborns but also helped lay the foundation for a burgeoning field dedicated to studying the origins of (C)_____.

25. What is the most appropriate word for both (A)“_____” and (C)_____?
 ① musicality ② pulse ③ pitch ④ loudness
26. What is the purpose of the passage?
 ① to show the progress of modern experimental techniques
 ② to emphasize the danger of experimenting with babies
 ③ to share and highlight a particular research finding
 ④ to encourage the openness of music industry
27. What does (B) responses refer to in the passage?
 ① electric sparks ② head-turning
 ③ baby’s crying ④ brain signal spikes
28. Which of the following is NOT true about the passage?
 ① Newborns can identify beats in music.
 ② Tiny participants played the drum.
 ③ The experiment used a drum to play beats.
 ④ The brain signals of the babies were monitored.

Newton is given credit for the invention of calculus, even if there is some argument that Leibniz deserves this (A) distinction. Subsequently, to a greater or lesser extent, many mathematicians made significant contributions to this area. Newton began his work on “new mathematics” in 1666. Thus, calculus is not modern. He applied calculus to general physics first and explained that calculus was (and still is) the math of changing quantities. Leibniz developed many of the symbols used in calculus today. He started first with integration while Newton did with differentiation. However, they arrived at the same results. Calculus has many important practical applications. Mathematics relating to time, rates, acceleration, gravity, economics, space is all included in it. Many students fear the word “calculus” since it is in a calculus course that most students become exposed to theoretical concepts and a large amount of terminology. Besides, numerical calculations and mathematical formulas are plentiful as well.

29. What is the best title for the passage?
 ① Calculus: The Most Important Mathematical Concept
 ② Who Should Be Recognized for the Inventor of Calculus
 ③ The Origin of Calculus and Its Applications
 ④ Newton: The Founder of Modern Mathematics
30. Which of the following is closest in meaning to (A) distinction?
 ① honor ② effort ③ invention ④ indifference
31. Which of the following is true about the passage?
 ① It was Leibniz that discovered calculus first.
 ② Many are terrified by the most advanced part of calculus.
 ③ Most scholars agree that Newton was the first to invent calculus.
 ④ Sufficient knowledge in calculus is required by all scientists and students.

Thirty years ago, a botanist in Germany had a simple wish: to see the inner workings of woody plants without dissecting them. By bleaching away the pigments in plant cells, Siegfried Fink managed to create transparent wood, and he published his technique in a wood technology journal. The 1992 paper remained the last word on (A)_____ wood for more than a decade, until a researcher named Lars Berglund stumbled across it. Berglund was inspired by Fink’s discovery, but not for botanical reasons. The materials scientist specializes in polymer composites and was interested in creating a more robust alternative to transparent plastic. And he wasn’t the only one interested in wood’s virtues. Across the ocean, researchers at the University of Maryland were busy on a related goal: harnessing the strength of wood for nontraditional purposes. Now, after years of experiments, the research of these groups is starting to bear fruit. Transparent wood could soon find uses in super-strong screens for smartphones, in soft glowing light fixtures and even as structural features, such as color-changing windows.

32. What is the most appropriate word for (A)_____?
 ① opaque ② warm ③ botanical ④ see-through
33. What is the best topic for the passage?
 ① Virtues of plastic ② Transparent wood
 ③ Polymer composites ④ Super-strong plastic
34. Which of the following does NOT belong to the nontraditional purposes of wood?
 ① smartphone screens ② light fixtures
 ③ firewood ④ color-changing windows
35. Which of the following is NOT true about the passage?
 ① Transparent wood can be an alternative to transparent plastic.
 ② Transparent wood could be used in smartphone screens.
 ③ Transparent wood could be used in windows.
 ④ Transparent wood has pigments in their plant cells.
